

RESEARCH EXPERIENCE FOR UNDERGRADUATES Accelerating New Environmental Workskills

June 6 - August 12, 2022 | University of Maine, Orono
For more info: <https://nsfa.umaine.edu/one-health/REU>

Subject to change, we expect to run an in-person program on the University of Maine campus in 2022.

Are you interested in the links between animal, human, and environmental health?
Join us this summer for a 10-week research experience!

Working directly with faculty mentors, REU ANEW students will:

- Tackle complex, interdisciplinary problems in One Health across marine and terrestrial environmental systems.
- Conduct research in the natural and social sciences, across diverse settings from the lab to field to policy.
- Develop critical research and thinking skills relevant to future career success.
- Partner with Broader Impacts mentors working directly in the field to understand the impacts of One Health research to real world problems, and explore career options in the field.
- Build lasting professional relationships with their undergraduate peers, graduate students, and mentors.

Apply by February 15, 2022 for full consideration.

Please go to <https://forms.gle/f6DEpNZFCe24jb1F6> to fill out the application form. You will need a 1-2 page resume (include education experiences, relevant work history, awards/scholarships, and volunteer/service activities), a copy of your unofficial transcript, and a short (100-500 words) personal statement detailing why you are interested in gaining research experience in general and within One Health in particular. As well, you will be directed to request at least 1 letter of recommendation; your application can not be considered complete until at least one letter of recommendation has been received.
